## About Master-Kids

Master-Kids is India's cradle-to-career learning platform — one platform that grows with a child from Pre-Nursery all the way to college, turning everyday effort into visible progress for parents and a rewarding game of streaks, XP and badges for children. This Olympiad practice series is part of the Master-Kids Primary School programme (Stage 2, Class 1-5). It is board-agnostic — suited to CBSE, ICSE and State Board children alike — and aligned with the NEP 2020 focus on foundational numeracy, science thinking and language.

## About This Worksheet

Worksheet 04 begins the Computation block. The child practises addition and subtraction with carrying and borrowing, missing-number sentences, two-step word problems (money, books, trains, cricket), pairs that make 1,000, and estimation by rounding — exactly the Computation Operations skills the IMO tests most often at this level.

## Learning Objectives

- Add and subtract 3- and 4-digit numbers with carrying and borrowing.
- Solve one- and two-step word problems involving addition and subtraction.
- Find missing numbers in addition and subtraction sentences.
- Recognise number pairs that make 100 and 1,000 for quick mental maths.
- Estimate sums by rounding to check answers.

## Instructions

1. This worksheet has 20 multiple-choice questions. Each question has exactly one correct answer.
2. Read every question carefully. Look at any picture, table or figure before choosing.
3. Each correct answer earns +1 mark. There is no negative marking, so attempt every question.
4. Write your chosen option — (A), (B), (C) or (D) — clearly in the answer box or on a separate sheet.
5. Do all rough work in the margin or on rough paper. Do not use a calculator.
6. After finishing, check your answers against the Answer Key, then read the Detailed Solutions to understand the reasoning behind every question — that is where the real learning happens.

Marking scheme: +1 mark for each correct answer · No negative marking · Maximum 20 marks.

### Step-by-Step Solutions

#### Q1. Correct answer: **(B)**

Ones:  $7 + 6 = 13$  (write 3, carry 1). Tens:  $4 + 5 + 1 = 10$  (write 0, carry 1). Hundreds:  $3 + 2 + 1 = 6$ .  
 Answer: **603**.

#### Q2. Correct answer: **(A)**

Ones:  $5 - 8$  needs borrowing  $\rightarrow 15 - 8 = 7$ . Tens: after lending,  $9 - 4 = 5$ . Hundreds:  $7 - 3 = 4$ .  
 Answer: **457**.

#### Q3. Correct answer: **(B)**

$1,236 + 1,452$ : ones  $6+2=8$ , tens  $3+5=8$ , hundreds  $2+4=6$ , thousands  $1+1=2 \rightarrow$  **2,688** books.

#### Q4. Correct answer: **(A)**

$3,500 - 1,275 =$  **2,225**. ( $3,500 - 1,000 = 2,500$ ;  $2,500 - 275 = 2,225$ .)

#### Q5. Correct answer: **(A)**

$700 - 462 =$  **238**. Check:  $462 + 238 = 700$ . ✓

#### Q6. Correct answer: **(B)**

Adding 1 to 2,999 rolls all the 9s over: **3,000**.

#### Q7. Correct answer: **(C)**

Adding **0** to any number leaves it unchanged.  $536 + 0 = 536$ .

#### Q8. Correct answer: **(A)**

$\text{₹}850 - \text{₹}375 =$  **₹475**. ( $850 - 300 = 550$ ;  $550 - 75 = 475$ .)

#### Q9. Correct answer: **(A)**

Greatest 2-digit = 99; smallest 3-digit = 100. Sum =  $99 + 100 =$  **199**.

#### Q10. Correct answer: **(B)**

$1,648 + 1,352 =$  **3,000**. (Notice  $648 + 352 = 1,000$  — number pairs that make a thousand make adding quick.)

#### Q11. Correct answer: **(A)**

One less than 4,000 is **3,999**.

#### Q12. Correct answer: **(B)**

Check each:  $425+175 = 600$  ✗;  **$638-238 = 400$**  ✓;  $350+250 = 600$  ✗;  $900-450 = 450$  ✗.

#### Q13. Correct answer: **(A)**

$124 - 96 =$  **28** pages more. ('How many more' means subtract.)

#### Q14. Correct answer: **(A)**

Other number =  $925 - 480 =$  **445**. Check:  $480 + 445 = 925$ . ✓

**Q15. Correct answer: (B)**

Adding 0 changes nothing.  $1,234 + 766 = \mathbf{2,000}$  ( $234 + 766 = 1,000$ ).

**Q16. Correct answer: (A)**

$1,540 - 325 = 1,215$ ; then  $1,215 + 180 = \mathbf{1,395}$ . Do the steps one at a time.

**Q17. Correct answer: (B)**

$268 \rightarrow 300$  and  $432 \rightarrow 400$ . Rounded sum =  $300 + 400 = \mathbf{700}$ . (Estimating like this helps you check answers quickly.)

**Q18. Correct answer: (A)**

$\mathbf{480 + 520 = 1,000}$ . ( $350 + 750 = 1,100$ ;  $640 + 460 = 1,100$ ;  $290 + 610 = 900$ .)

**Q19. Correct answer: (A)**

$287 - 263 = \mathbf{24}$  runs. The winning margin is the difference of the scores.

**Q20. Correct answer: (A)**

$9,999 - 1,000 = \mathbf{8,999}$ .
