About Master-Kids

Master-Kids is India's cradle-to-career learning platform — one platform that grows with a child from Pre-Nursery all the way to college, turning everyday effort into visible progress for parents and a rewarding game of streaks, XP and badges for children. This Olympiad practice series is part of the Master-Kids Primary School programme (Stage 2, Class 1-5). It is board-agnostic — suited to CBSE, ICSE and State Board children alike — and aligned with the NEP 2020 focus on foundational numeracy, science thinking and language.

About This Worksheet

Worksheet 05 builds fluency in multiplication and division. The child practises tables up to 12, multiplying by 10 and 100, equal groups and equal sharing word problems, remainders, missing-factor sentences, and the special rules of 0 and 1 — plus a gentle two-step problem at the end. Strong tables are the single biggest speed advantage in an Olympiad.

Learning Objectives

- Recall multiplication tables up to 12 quickly and accurately.
- Multiply by 10 and 100 using the zeros rule, and divide by 10.
- Solve equal-groups and equal-sharing word problems.
- Find quotients and remainders, and missing factors.
- Apply the special rules of multiplying by 0 and 1, and dividing a number by itself.

Instructions

1. This worksheet has 20 multiple-choice questions. Each question has exactly one correct answer.
2. Read every question carefully. Look at any picture, table or figure before choosing.
3. Each correct answer earns +1 mark. There is no negative marking, so attempt every question.
4. Write your chosen option — (A), (B), (C) or (D) — clearly in the answer box or on a separate sheet.
5. Do all rough work in the margin or on rough paper. Do not use a calculator.
6. After finishing, check your answers against the Answer Key, then read the Detailed Solutions to understand the reasoning behind every question — that is where the real learning happens.

Marking scheme: +1 mark for each correct answer · No negative marking · Maximum 20 marks.

Step-by-Step Solutions

Q1. Correct answer: (B)

From the table of 7 (or 8): $7 \times 8 = 56$.

Q2. Correct answer: (C)

Multiplying by 10 adds one zero: $46 \times 10 = 460$.

Q3. Correct answer: (B)

Multiplying by 100 adds two zeros: $23 \times 100 = 2,300$.

Q4. Correct answer: (C)

$6 \times 9 = 54$, so $54 \div 6 = 9$. Division is the reverse of multiplication.

Q5. Correct answer: (B)

9 boxes $\times$ 6 eggs = **54** eggs. Equal groups means multiply.

Q6. Correct answer: (B)

$72 \div 8 = 9$ chocolates each, because $8 \times 9 = 72$. Equal sharing means divide.

Q7. Correct answer: (C)

Any number multiplied by 0 gives **0**.

Q8. Correct answer: (C)

Any number multiplied by 1 stays the same: **325**.

Q9. Correct answer: (C)

$15 \times 4 = (10 \times 4) + (5 \times 4) = 40 + 20 = 60$. Breaking the number up makes it easy.

Q10. Correct answer: (D)

$4 \times 8 = 32$, and $35 - 32 = 3$. Quotient 8, remainder **3**.

Q11. Correct answer: (C)

$63 \div 7 = 9$, because $9 \times 7 = 63$.

Q12. Correct answer: (B)

$8 \times 12 = 96$ cars. ($8 \times 10 = 80$, plus $8 \times 2 = 16$, total 96.)

Q13. Correct answer: (B)

$100 \div 10 = 10$, because $10 \times 10 = 100$. Dividing by 10 removes one zero.

Q14. Correct answer: (B)

Adding 5 four times is $4 \times 5 = 20$. Multiplication is repeated addition.

Q15. Correct answer: (C)

$6 \times 7 = 42$ days.

**Q16. Correct answer: (B)**

Any number (except 0) divided by itself gives **1**.

Q17. Correct answer: (C)

$36 \div 6 = 6$ **exactly**, remainder 0. ($25 \div 4$ leaves 1; $30 \div 7$ leaves 2; $50 \div 8$ leaves 2.)

Q18. Correct answer: (B)

$9 \times 7 = 63$, then $63 + 5 = 68$ saplings. Multiply first, then add the extra.

Q19. Correct answer: (C)

Double means multiply by 2: $250 \times 2 = 500$.

Q20. Correct answer: (C)

$60 \div 5 = 12$ boxes, because $12 \times 5 = 60$.
