About Master-Kids

Master-Kids is India's cradle-to-career learning platform — one platform that grows with a child from Pre-Nursery all the way to college, turning everyday effort into visible progress for parents and a rewarding game of streaks, XP and badges for children. This Olympiad practice series is part of the Master-Kids Primary School programme (Stage 2, Class 1-5). It is board-agnostic — suited to CBSE, ICSE and State Board children alike — and aligned with the NEP 2020 focus on foundational numeracy, science thinking and language.

About This Worksheet

Worksheet 06 completes the beginner Computation block by mixing all four operations. The child learns the golden rule of order (multiply and divide before add and subtract), uses brackets, estimates answers by rounding, and solves two-step word problems — including the Olympiad favourite 'smallest number of packs' question that needs thinking, not just calculating.

Learning Objectives

- Apply the correct order of operations, including brackets.
- Solve two-step word problems mixing $\times$, $\div$, $+$ and $-$.
- Estimate answers by rounding before calculating.
- Find missing numbers in division and multiplication sentences.
- Reason about 'at least how many' problems with remainders.

Instructions

1. This worksheet has 20 multiple-choice questions. Each question has exactly one correct answer.
2. Read every question carefully. Look at any picture, table or figure before choosing.
3. Each correct answer earns +1 mark. There is no negative marking, so attempt every question.
4. Write your chosen option — (A), (B), (C) or (D) — clearly in the answer box or on a separate sheet.
5. Do all rough work in the margin or on rough paper. Do not use a calculator.
6. After finishing, check your answers against the Answer Key, then read the Detailed Solutions to understand the reasoning behind every question — that is where the real learning happens.

Marking scheme: +1 mark for each correct answer · No negative marking · Maximum 20 marks.

Step-by-Step Solutions

Q1. Correct answer: **(B)**

Multiply before adding: $30 \times 2 = 60$, then $20 + 60 = 80$. (Doing $20 + 30$ first gives the wrong answer 100.)

Q2. Correct answer: **(C)**

Divide before subtracting: $40 \div 4 = 10$, then $100 - 10 = 90$.

Q3. Correct answer: **(B)**

Double of $36 = 72$. Then $72 - 12 = 60$.

Q4. Correct answer: **(B)**

$125 \times 4 = 500$ buns. ($125 \times 4 = 100 \times 4 + 25 \times 4 = 400 + 100$.)

Q5. Correct answer: **(A)**

$96 \div 4 = 24$ per house. After 2 leave: $24 - 2 = 22$.

Q6. Correct answer: **(B)**

$50 + 50 = 100$; $60 \times 2 = 120$; $200 \div 2 = 100$; $150 - 40 = 110$. The greatest is 120.

Q7. Correct answer: **(B)**

49 rounds to 50, and $50 \times 5 = 250$. So the estimate is **about 250** (exact answer 245).

Q8. Correct answer: **(B)**

Brackets first: $15 + 25 = 40$. Then $40 \div 8 = 5$.

Q9. Correct answer: **(B)**

4 packs give only 40 pencils — not enough. She needs **5 packs** (50 pencils) to have at least 47.

Q10. Correct answer: **(B)**

$7 \times 6 = 42$, then $42 - 6 = 36$. (Notice $7 \times 6 - 6$ is the same as 6×6 .)

Q11. Correct answer: **(C)**

$8 \times 15 = 120$ litres. ($8 \times 10 = 80$ plus $8 \times 5 = 40$.)

Q12. Correct answer: **(A)**

$45 \div 5 = 9$, because $9 \times 5 = 45$. The missing number is 5.

Q13. Correct answer: **(A)**

$195 + 240 = 435$ people.

Q14. Correct answer: **(B)**

$1,000 - 250 = 750$, then $750 - 250 = 500$. (Taking away two 250s is taking away 500.)

Q15. Correct answer: **(A)**

$9 \times 6 = 54$ plants, then $54 - 4 = 50$ healthy plants.

Q16. Correct answer: (C)

$12 \times 5 = 60$, not 70. So $12 \times 5 = 70$ is false. The rest are true.

Q17. Correct answer: (C)

$\text{₹}25 \times 8 = \text{₹}200$. ($25 \times 8 = 25 \times 4 \times 2 = 100 \times 2$.)

Q18. Correct answer: (C)

Half of 180 = 90. Then $90 + 10 = 100$.

Q19. Correct answer: (A)

$\text{₹}30 \div 6 = \text{₹}5$ per pencil. Cost of one = total cost $\div$ number of items.

Q20. Correct answer: (B)

$198 \approx 200$ and $304 \approx 300$; $200 + 300 = \text{about } 500$ (exact 502).
