About Master-Kids

Master-Kids is India's cradle-to-career learning platform — one platform that grows with a child from Pre-Nursery all the way to college, turning everyday effort into visible progress for parents and a rewarding game of streaks, XP and badges for children. This Olympiad practice series is part of the Master-Kids Primary School programme (Stage 2, Class 1–5). It is board-agnostic — suited to CBSE, ICSE and State Board children alike — and aligned with the NEP 2020 focus on foundational numeracy, science thinking and language.

About This Worksheet

Worksheet 09 completes the beginner reasoning trio with analogies (finding the hidden relationship), classification (grouping and odd one out), and clock & calendar questions — three of the most frequent SOF Logical Reasoning chapters. The child learns to name the relationship in words first ('animal → home', 'organ → sense'), which makes every analogy easy.

Learning Objectives

- Solve word and number analogies by naming the relationship.
- Classify objects into groups and find the one that does not belong.
- Read clock times and identify angles between clock hands.
- Use the 7-day cycle to find days before and after a date.
- Recall days-in-month facts and month order.

Instructions

1. This worksheet has 20 multiple-choice questions. Each question has exactly one correct answer.
2. Read every question carefully. Look at any picture, table or figure before choosing.
3. Each correct answer earns +1 mark. There is no negative marking, so attempt every question.
4. Write your chosen option — (A), (B), (C) or (D) — clearly in the answer box or on a separate sheet.
5. Do all rough work in the margin or on rough paper. Do not use a calculator.
6. After finishing, check your answers against the Answer Key, then read the Detailed Solutions to understand the reasoning behind every question — that is where the real learning happens.

Marking scheme: +1 mark for each correct answer · No negative marking · Maximum 20 marks.
