About Master-Kids

Master-Kids is India's cradle-to-career learning platform — one platform that grows with a child from Pre-Nursery all the way to college, turning everyday effort into visible progress for parents and a rewarding game of streaks, XP and badges for children. This Olympiad practice series is part of the Master-Kids Primary School programme (Stage 2, Class 1-5). It is board-agnostic — suited to CBSE, ICSE and State Board children alike — and aligned with the NEP 2020 focus on foundational numeracy, science thinking and language.

About This Worksheet

Worksheet 13 puts measurement to work in everyday stories — tailors and cloth, milkmen and litres, lifts with weight limits, snails on walls. The child adds, subtracts, multiplies and divides measurements, always converting mixed units to a single unit first. Several questions have a two-step structure, gently raising the thinking level within the beginner band.

Learning Objectives

- Add and subtract lengths, weights and capacities in mixed units.
- Multiply and divide measurements in equal-groups situations.
- Convert to a single unit before calculating — every time.
- Solve two-step measurement stories (use, refill, cut, share).
- Check totals against limits (the lift problem) and compare quantities.

Instructions

1. This worksheet has 20 multiple-choice questions. Each question has exactly one correct answer.
2. Read every question carefully. Look at any picture, table or figure before choosing.
3. Each correct answer earns +1 mark. There is no negative marking, so attempt every question.
4. Write your chosen option — (A), (B), (C) or (D) — clearly in the answer box or on a separate sheet.
5. Do all rough work in the margin or on rough paper. Do not use a calculator.
6. After finishing, check your answers against the Answer Key, then read the Detailed Solutions to understand the reasoning behind every question — that is where the real learning happens.

Marking scheme: +1 mark for each correct answer · No negative marking · Maximum 20 marks.

Step-by-Step Solutions
Q1. Correct answer: (A)

8 m = 800 cm and 3 m 50 cm = 350 cm. Left = $800 - 350 = 450$ cm = **4 m 50 cm**.

Q2. Correct answer: (B)

$1,500 + 750 = 2,250$ mL = **2 L 250 mL**.

Q3. Correct answer: (B)

$2,300 + 1,800 = 4,100$ g = **4 kg 100 g**.

Q4. Correct answer: (C)

3 buckets = $3 \times 12 = 36$ L = **36 mugs**.

Q5. Correct answer: (C)

$600 + 600 = 1,200$ m = **1 km 200 m**.

Q6. Correct answer: (D)

3 kg = 3,000 g. $3,000 \div 500 = 6$ packets.

Q7. Correct answer: (A)

9 m 60 cm = 960 cm. $960 \div 3 = 320$ cm = **3 m 20 cm**.

Q8. Correct answer: (B)

$2,000 - 1,350 = 650$ mL more.

Q9. Correct answer: (C)

$9 \times 2 = 18$ kg.

Q10. Correct answer: (A)

$35 - 10 = 25$, then $25 + 20 = 45$ cm high.

Q11. Correct answer: (C)

$15 + 12 = 27$ L.

Q12. Correct answer: (B)

$750 \times 2 = 1,500$ mL = **1 L 500 mL**.

Q13. Correct answer: (A)

$5,000 - 400 = 4,600$ g = **4 kg 600 g**.

Q14. Correct answer: (C)

$12 + 8 + 5 = 25$ km.

Q15. Correct answer: (C)

Anu = 1,000 mL, Banu = 950 mL, Charu = 1,050 mL. **Charu** drank the most.

Q16. Correct answer: (C)

$2\text{ m} = 200\text{ cm}$. $200 \div 25 = 8$ pieces.

Q17. Correct answer: (B)

$120 + 95 + 90 = 305\text{ kg}$, which is MORE than 300 kg — so no, they cannot all go together.

Q18. Correct answer: (A)

$250 \times 4 = 1,000\text{ mL} = 1\text{ L}$.

Q19. Correct answer: (B)

$1\text{ m } 25\text{ cm} = 125\text{ cm}$. $125 \times 2 = 250\text{ cm} = 2\text{ m } 50\text{ cm}$.

Q20. Correct answer: (A)

Sold = $2,500 + 3,500 = 6,000\text{ g} = 6\text{ kg}$. Left = $10 - 6 = 4\text{ kg}$.
