About Master-Kids

Master-Kids is India's cradle-to-career learning platform — one platform that grows with a child from Pre-Nursery all the way to college, turning everyday effort into visible progress for parents and a rewarding game of streaks, XP and badges for children. This Olympiad practice series is part of the Master-Kids Primary School programme (Stage 2, Class 1-5). It is board-agnostic — suited to CBSE, ICSE and State Board children alike — and aligned with the NEP 2020 focus on foundational numeracy, science thinking and language.

About This Worksheet

Worksheet 14 is all about time — reading the clock, quarter past / half past / quarter to, a.m. and p.m., finding how long an activity took, crossing 12 noon, sleeping through midnight, and calendar facts like leap years and weeks. Time questions appear in every IMO under 'Time and Money', and the crossing-noon and crossing-midnight cases are the classic traps.

Learning Objectives

- Read clock times, including quarter past, half past and quarter to.
- Use a.m. and p.m. correctly for morning and night times.
- Calculate end times and elapsed times, including across 12 noon and midnight.
- Convert between hours, minutes, days and weeks.
- Recall calendar facts: leap years, days in February, days in a month.
