About Master-Kids

Master-Kids is India's cradle-to-career learning platform — one platform that grows with a child from Pre-Nursery all the way to college, turning everyday effort into visible progress for parents and a rewarding game of streaks, XP and badges for children. This Olympiad practice series is part of the Master-Kids Primary School programme (Stage 2, Class 1-5). It is board-agnostic — suited to CBSE, ICSE and State Board children alike — and aligned with the NEP 2020 focus on foundational numeracy, science thinking and language.

About This Worksheet

Worksheet 34 handles time like the IMO does at intermediate level: converting hours↔minutes with remainders, journeys that cross noon AND midnight, working BACKWARDS from an end time, weekly totals (45 min × 7 days), counting days inclusively, and leap years. The backwards questions and the overnight train are where most children slip — and where Olympiad marks are won.

Learning Objectives

- Convert between hours, minutes and seconds, with remainders.
- Find durations across 12 noon and across midnight.
- Work backwards from an end time to a start time.
- Count days between dates inclusively and identify leap years.
- Total repeated daily durations over a week.

Instructions

1. This worksheet has 20 multiple-choice questions. Each question has exactly one correct answer.
2. Read every question carefully. Look at any picture, table or figure before choosing.
3. Each correct answer earns +1 mark. There is no negative marking, so attempt every question.
4. Write your chosen option — (A), (B), (C) or (D) — clearly in the answer box or on a separate sheet.
5. Do all rough work in the margin or on rough paper. Do not use a calculator.
6. After finishing, check your answers against the Answer Key, then read the Detailed Solutions to understand the reasoning behind every question — that is where the real learning happens.

Marking scheme: +1 mark for each correct answer · No negative marking · Maximum 20 marks.
